

Using the ANZ CP Strategy

The ANZ CP Strategy

The Australian and New Zealand Cerebral Palsy Strategy (the Strategy) outlines key priority areas for the field of cerebral palsy. The Strategy was authored by a broad coalition of national cerebral palsy focused organisations, service providers, researchers, professionals and people with cerebral palsy and their families from Australia and New Zealand.

The Strategy has four goal areas: Prevention and cures, Intervention and disability support, Health and well-being; and Inclusion and engagement, and aims to improve the health, function, participation, and quality of life of people with cerebral palsy and their families.

The Purpose

The Strategy is for anyone interested in cerebral palsy and is intended to be used as a guide for key decision makers to deliver support, promote excellence in research, leverage funding and enhance community knowledge.

How to Use the Strategy

- **Informing your Organisation's Strategic Plan:** The Strategy can be used as a starting point when discussing your organisation's specific goals for cerebral palsy research, intervention, and advocacy.
- **Advocacy and Influence:** The Strategy is a useful tool when discussing cerebral palsy with broader audiences such as clinicians or local politicians and legislators.
- **Information and Toolkits:** The Strategy website houses resources to direct advocacy and research, especially for various areas of unmet needs.
- **A Collaborative Network:** The Strategy has brought together researchers, clinicians, community advisors and those with lived experience of cerebral palsy across Australia and New Zealand. This group is keen to collaborate to make progress towards Strategy goals and we welcome further input, both across the general strategy and in specific areas.
